

# EXPO Evolution™

An ExpoDisplays Product

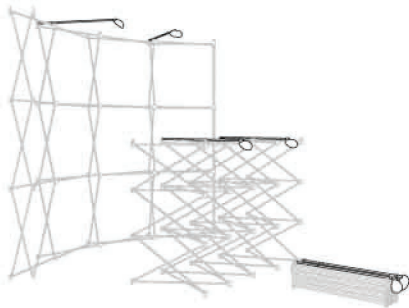

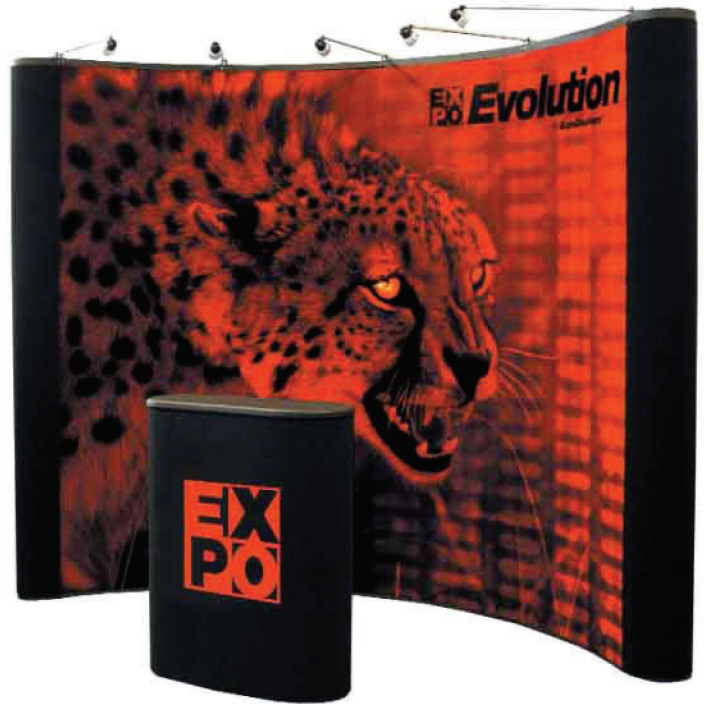

www.exhibitdevelopmentgroup.com

ExpoDisplay's 30 years of research and development culminated with the Evolution, the industry's premium pop-up display. Evolution is a powerful combination of flexibility, durability and simplicity. Loaded with features and options, Evolution can take your exhibit program to the next level.

The easy-to-assemble lightweight reinforced aluminum framework is available in a wide variety of standard models, from tabletop, to floor models in both curved and flat, to larger island configurations.

Evolution comes with Velcro®-receptive fabric panel or graphic mural panels. The Evolution's unique tubular frame and construction allow the framework to be reconfigured on location, to accommodate various height or width options—all from one frame.

An innovative three-piece channel bar system, magnet-to-magnet panel application and many other features make Evolution one of the most user friendly pop-up displays on the market.

LF56  
200-Watt Halogen Light

LF74  
12V 50-Watt Halogen Deluxe Light

**Lighting**

Evolution's lights stay attached to the framework, making setup quicker and foolproof—no need to search for ladders or chairs to stand on at the show! Standard models use two 200-watt halogen floodlights for excellent light coverage. The Deluxe model features a wired frame, lightweight transformer and five low voltage halogens for a truly different high tech look to elevate your image over the competition on the show floor.

SC88 Large Oval Case w/Fabric Wrap

SC83 Small Oval Case

SC80 Octagon Case

**Storage and Transportation**

Evolution owners have three case options. The Large Oval case accommodates a complete 10' floor model for an entire display in one wheeled case. Octagon cases provide a two case per floor model option, or may be used individually for table top models. Small Oval cases offer a smaller option for table top displays. Heavy-duty latches accept locks for extra security. With optional podium conversion kits, you can turn your cases into functional podiums—no need to store or hide cases at the show.

EBC35  
Backwall Cabinet

PDSK4  
Shadow Box

**Functional Accessories**

Innovative accessories allow you to customize your Evolution display. Backwall cabinets, podiums and counters provide valuable storage and countertop space. Lighted product display boxes bring extra attention to your special products. Your Authorized ExpoDisplays Distributor will help choose the accessories needed for a functional and effective display.

ESK1 Reversible Shelf (Flat)

ESK1 Reversible Shelf (Literature)

**Shelving**

Evolution's unique reversible shelving system allows you to choose angled shelves (to display literature) or flat shelves (to display products) from the same hardware! The shelf brackets insert between panels to provide a seamless, finished look no matter where they are placed on the display.

**Tabletop Conversion**

The Evolution pop-up display features the industry's only convertible framework that allows for both full-sized and tabletop configurations from the same frame. All you need is an extra set of panels—the rest is built-in!
